## Work Experience

Our project guide miss **Jinal Mashru** provided full support to us. She always helped us just like a companion and not just as professional guide; she also provide the information required by us at any time. She personally worked hard for our project. Also the other faculty members related to the computer department never refused to help us. Also the institute has provided the immense help by leap and bounds.

We also learnt some designing techniques; so we heartily thankful to all who helped me in gradually climbing the steps towards the completion of this project of hotel management system. Thank you all faculty members giving us such a great opportunity’.

Last but not the least the overall experience of developing this project is as good as studying an entire new subject to fueling up the knowledge treasure.

Thank You.
